EASY-UP MANIFOLD KIT

SAVES TIME

Ready to install design reduces average single boiler installation time

SAVES MONEY

Less than the cost of all components, plus assembly time including layout, measuring, cutting, soldering, etc.

EASY INSTALLATION

A few connections while ensuring proper flow through the boiler

ELIMINATES PIPING ERRORS

Helps ensure correct piping strategy by incorporating the primary/secondary piping requirements

PROVIDES A PROFESSIONAL APPEARANCE

Neat joints, top quality components, color-coded valves, precise and true installation

SIMPLE SYSTEM SERVICING

Manifold shut off valves provide quick isolation of the boiler and circulator from system piping
